Guidelines for Authors

BIONOTE publishes short notes on any aspect
of biology. Usually, submissions are reviewed
by one or two reviewers.

Kindly submit a manuscript after studying the
format used in this journal
(<http://www.entosocindia.org/>).

The editor reserves the right to reject articles
that do not adhere to our format. Please provide
a contact telephone number. Authors will be
provided with a pdf file of their publication.

INTRODUCTION

Within India, *Pontia daplidice* has a known distribution range from Jammu and Kashmir to Uttarakhand (Kehimkar 2008; Singh 2010); Kehimkar (2016) reported it from Arunachal Pradesh; Naro & Sondhi (2013) recorded it from Nagaland and Arunachal Pradesh; Singh & Gogoi (2013) reported it from Assam and Manipur. Smetacek (2002) found this as a very common species in the Himalayan foothills of Kumaon (Uttarakhand) and mentioned that this species can be observed on the wing from March to July.

In Bihar, we observed this species in February 2024 for the first time and photographed it successfully on 02 March 2024, while it was nectaring on flowers of *Coriandrum sativum* near Sirsa village (Block Motihari and district East Champaran).

DISCUSSION

The present observation is significant since the species has been mostly recorded at

high elevations, while we recorded *P. daplidice* at 65m elevation (26.61177483°N 84.98377036°E. Subsequently a total of four individuals of *P. daplidice* were observed in two different localities, namely Sirsa and Madhubanighat (Block Motihari and district East Champaran). The species has been recorded throughout Nepal at all months except January, from 140 -3700 m elevation (Poel & Smetacek, 2022). Its appearance in East Champaran district is therefore not surprising, since this district borders Nepal to the north and it is possible that the specimens recorded descended to the plains of Bihar from Nepal.

ACKNOWLEDGEMENT

We are thankful to Peter Smetacek (Butterfly Research Centre, Bhimtal) for his regular guidance and support in butterfly documentation and conservation.
