Gahan (1906) is the pioneer worker on cerambycid beetles in India, as well as in West Bengal. Biswas et al. (2014) in their work on Dooars have reported 178 species of cerambycid beetles from West Bengal. Recently, Mitra et al. (2015) have published a list of 146 species under 84 genera of 38 tribes belonging to 4 subfamilies of the family Cerambycidae from West Bengal.

After consultation of the *Catalogue of Palaearctic Cerambycoidea* (Updated on 20.02.17) by Danilevsky (2010), and other available literature, present communication reports 512 species under 197 genera of 52 tribes belonging to 4 subfamilies of the family Cerambycidae from the state of West Bengal (Table 1). Among these, subfamily Lamiinae shares 340 species under 124 genera of 25 tribes, followed by Cerambycinae (143 species, 57 genera and 19 tribes), Prioninae (24 species, 11 genera and 6 tribes) and Lepturinae (5 species, 5 genera and 2 tribes) (Table 1).

Of them, 66% species are restricted in their distribution within the Oriental Region, and 31.50% species extend their distribution up to Palaearctic Region. Besides this, 2.30% species of cerambycid fauna of West Bengal are also found in Afrotropical Region, followed by 1.70% species in Nearctic, 1.50% species in Australasian and 0.20% species in Neotropical Regions.

District-wise reported species reveal that, Darjeeling is the highly explored district (392 species), followed by

Jalpaiguri (93), Kolkata (11), Kalimpong (10), South 24 Parganas (10), Malda and West Midnapore only one species each. There are 19 species which are reported from 'West Bengal' having no specific locality (marked NSL).

Acknowledgements : The Authors are thankful to Dr. Kailash Chandra, Director, Zoological Survey of India for providing necessary facilities. Our sincere thanks are also due to Shri K.C. Gopi, Additional Director, Zoological Survey of India for his constant support and encouragement.

Table 1. List of Cerambycid species so far reported from West Bengal.

Tribe	Species name	District
SUBFAMILY LEPTURINAE		
1	LEPTURINI <i>Paranaspia frainii</i> (Fairmarie, 1897)	Darjeeling
2	<i>Pyrocalymma pyrochroides</i> Pic, 1927	Darjeeling
3	XYLOSTEINI <i>Formosotoxotus masatakai</i> Ohbayashi, 2007	Darjeeling
4	<i>Palaeoxylosteus kurosawai</i> Ohbayashi & Shimomura, 1986	Darjeeling
5	<i>Peithona prionoides</i> Gahan, 1906	Darjeeling
SUBFAMILY PRIONINAE		
6	AEGOSOMATINI <i>Aegosoma bowringi</i> Gahan, 1894	Jalpaiguri
7	<i>Aegosoma sinicum ornaticolle</i> White, 1853	Darjeeling
8	<i>Baralipon maculosum</i> Thomson, 1857	Darjeeling, Kolkata
9	<i>Dinoprionus cephalotes</i> Bates, 1875	Darjeeling

10		<i>Nepiodes bowringi</i> (Gahan, 1894)	Jalpaiguri
11		<i>Nepiodes costipennis costipennis</i> (White, 1853)	Jalpaiguri
12		<i>Nepiodes sulcipennis</i> (White, 1853)	South 24 Parganas
13		<i>Spinimegopsis nepalensis</i> (Hayashi, 1979)	Darjeeling
14		<i>Spinimegopsis tibialis</i> (White, 1853)	Kalimpong, Darjeeling
15	ANACOLINI	<i>Sarmydes antennatus</i> Pascoe, 1867	Darjeeling
16	EURYPODINI	<i>Palaeomegopsis lameeri</i> Boppe, 1911	Darjeeling
17	MACROTOMINI	<i>Anomophysis elliotti</i> (Waterhouse, 1884)	Jalpaiguri
18		<i>Anomophysis inscripta</i> (Waterhouse, 1884)	Darjeeling, Kolkata
19		<i>Anomophysis plagiata</i> (Waterhouse, 1884)	Darjeeling
20		<i>Anomophysis spinosa</i> (Fabricius, 1787)	Jalpaiguri
21	PRIONINI	<i>Dorysthenes (Lophosternus) buqueti</i> (Guerin-Meneville, 1844)	Jalpaiguri
22		<i>Dorysthenes (Lophosternus) granulatus</i> (Thomson, 1861)	Darjeeling, Jalpaiguri
23		<i>Dorysthenes (Lophosternus) huegelii</i> (Redtenbacher, 1844)	Darjeeling
24		<i>Dorysthenes (Lophosternus) indicus</i> Hope, 1831	Jalpaiguri, Darjeeling
25		<i>Dorysthenes (Lophosternus) zivetta</i> Thomson, 1877	Darjeeling
26		<i>Dorysthenes rostratus</i> (Fabricius, 1793)	Jalpaiguri
27		<i>Prionomma (Ancyloprotus) bigibbosus</i> White, 1853	Darjeeling
28	REMPHANINI	<i>Rhaphipodus gahani</i> Lameere, 1903	Darjeeling
29		<i>Rhaphipodus subopacus</i> Gahan, 1890	NSL
		SUBFAMILY CERAMBYCINAE	
30	ANAGLYPTINI	<i>Anaglyptus (Agalophis) fasciatus</i> (Thomson, 1857)	Darjeeling
31		<i>Anaglyptus longispinis</i> Gardner, 1939	Darjeeling
32	CALLICHRMATINI	<i>Anubis bipustulatus</i> Thomson, 1865	Darjeeling
33		<i>Anubis fimbriatus</i> Bates, 1879	Darjeeling
34		<i>Anubis inermis</i> (White, 1853)	Darjeeling
35		<i>Aphrodisium (Aphrodisium) cantori</i> (Hope, 1839)	Darjeeling
36		<i>Aphrodisium (Aphrodisium) cribricolle</i> Neervoort van de Poll, 1890	Darjeeling
37		<i>Aphrodisium (Aphrodisium) hardwickianum</i> White, 1853	Darjeeling
38		<i>Aphrodisium (Aphrodisium) neoxenum</i> White, 1853	Darjeeling
39		<i>Aphrodisium (Aphrodisium) planicolle</i> Neervoort van de Poll, 1890	Darjeeling
40		<i>Aphrodisium (Aphrodisium) robustum</i> Bates, 1879	Darjeeling
41		<i>Aphrodisium (Opacaphrodisium) griffithi</i> Hope, 1839	Darjeeling
42		<i>Cataphrodisium rubripenne</i> (Hope, 1843)	NSL
43		<i>Chelidonium argentatum</i> (Dalman, 1817)	Darjeeling
44		<i>Chloridolum (Chloridolum) alcmene</i> Thomson, 1865	Darjeeling
45		<i>Chloridolum (Chloridolum) nympha</i> (White, 1853)	Darjeeling
46		<i>Ipothalia micaria</i> Holzschuh, 1990	Darjeeling
47		<i>Polyzonus (Polyzonus) bizonatus</i> White, 1853	Darjeeling
48		<i>Polyzonus brevipes</i> Gahan, 1906	Darjeeling
49		<i>Polyzonus sinense</i> (Hope, 1841)	Darjeeling
50		<i>Scalenus fulvus</i> (Bates, 1879)	Darjeeling
51		<i>Zonopterus flavitarsis</i> Hope, 1842	Darjeeling
52	CALLIDIINI	<i>Callidium viridicolle</i> Pic, 1926	Darjeeling
53	CALLIDIOPINI	<i>Ceresium declaratum</i> Holzschuh, 1990	Darjeeling

54		<i>Ceresium lepidulum</i> Holzschuh, 1982	Darjeeling
55		<i>Ceresium leucosticticum</i> White, 1855	Jalpaiguri
56		<i>Ceresium propinquum</i> Holzschuh, 1982	Darjeeling
57		<i>Ceresium rufum</i> Lameere, 1890	Jalpaiguri
58		<i>Ceresium zeylanicum</i> White, 1855	Jalpaiguri, South 24 Parganas
59		<i>Gelonaetha hirta</i> (Fairmaire, 1850)	Kolkata
60		<i>Stenodryas apicalis</i> Gahan, 1893	West Midnapore
61		<i>Stenodryas bicoloripes</i> Pic, 1922	Jalpaiguri
62		<i>Stenodryas fascipennis</i> Holzschuh, 1984	Darjeeling
63		<i>Stenodryas nigromaculatus</i> (Gardner, 1942)	Jalpaiguri
64	CERAMBYCINI	<i>Aeolesthes (Aeolesthes) holosericea</i> Fabricius, 1787	Darjeeling
65		<i>Aeolesthes (Aeolesthes) indicola</i> Bates, 1891	Darjeeling, Jalpaiguri
66		<i>Derolus discicollis</i> Gahan, 1906	South 24 Parganas
67		<i>Derolus mauritanicus</i> (Buquet, 1840)	Jalpaiguri
68		<i>Dialeges pauper</i> Pasco, 1856	Darjeeling
69		<i>Diorthus cinereus</i> (Fabricius, 1793)	NSL
70		<i>Hoplocerambyx spinicornis</i> (Newman, 1842)	Darjeeling, Jalpaiguri
71		<i>Neocerambyx paris</i> (Wiedemann, 1821)	Darjeeling
72		<i>Neoplocaederus ferrugineus</i> (Linnaeus, 1758)	Kolkata
73		<i>Neoplocaederus obesus</i> Gahan, 1890	NSL
74		<i>Pachydissus parvicollis</i> Gahan, 1891	Darjeeling, Jalpaiguri
75		<i>Pachydissus schmutzenhoferi</i> Holzschuh, 1990	Darjeeling
76		<i>Rhytidodera bowringii</i> White, 1853	Darjeeling
77		<i>Rhytidodera consona</i> Holzschuh, 1965	Darjeeling
78		<i>Trachylophus sinensis</i> Gahan, 1888	Jalpaiguri
79		<i>Xoanodera regularis</i> Gahan, 1890	Darjeeling, Jalpaiguri
80	CLEOMENINI	<i>Artimpaza obscura</i> Gardner, 1926	Darjeeling

New Fabrics from Nature

Whether lotus, hemp or bamboo, the long bast fibres from the stem are extracted and spun into yarn, with or without chemical solvents. The yarn is then woven into cloth. There's also seaweed fabric manufactured in a similar way, and viscose made from woodpulp.

Banana Wear : Textile researchers at Maharaja Sayajirao University of Baroda recycle waste generated at banana plantations into fabric. They've succeeded at manufacturing banana cloth.

Fish and Mushroom leather : Fish leather is a roughly

40-day process that involves soaking fish skins in chemical solutions to remove the scales and oils, and then tanning them. Mushroom leather, on the other hand, cultivates the fungus for fashion, manipulating its mycelium or 'skin' under varying conditions of temperature and humidity and then tanning it to arrive at a convincing, animal-friendly stand-in for leather.

Fish leather makes use of discarded fish skins. Mushroom leather is strong, durable, carbon-negative and versatile: it can be tweaked to resemble cow, snake and even ostrich skin.
