Publication Policy

Information, statements or findings
published are the views of its author/ source
only.

Manuscripts

Please E-mail to petersmetacek@gmail.com.

Guidelines for Authors

BIONOTES publishes short notes on any
aspect of biology. Usually submissions are
reviewed by one or two reviewers.

Kindly submit a manuscript after studying the
format used in this journal
(<http://www.entosocindia.org/>).

Editor reserves the right to reject articles that do not
adhere to our format. Please provide a contact
telephone number. Authors will be provided
with a pdf file of their publication.

TABLE OF CONTENTS

FIRST RECORD OF RED IMPERIAL BUTTERFLY <i>SUASA LISIDES</i> (INSECTA: LEPIDOPTERA: LYCAENIDAE) FROM TRIPURA, NORTH-EAST INDIA by Nihar Chandra Deb & Sudipta Mandal	110
ADDITION OF THE BUTTERFLY <i>APPIAS GALBA</i> (WALLACE, 1867) TO THE FAUNA OF MANIPUR, INDIA by Jatishwor Singh Irungbam, Harmenn Huidrom & Premjit Singh Elangbam	112
FIRST RECORD OF <i>DODONA DIPOEA</i> HEWITSON, [1866] (LEPIDOPTERA: RIODINIDAE: NEMEOBIINAE) FROM MEGHALAYA, NORTHEASTERN INDIA by Atanu Bora, Laishram Ricky Meitei, Sachin Sharma, Suman Bhowmik & Ngangom Aomoa	114
FIRST RECORD OF <i>PSEUDOCATHARYLLA NIGROCILIELLA</i> ZELLER, 1863 (LEPIDOPTERA: CRAMBIDAE) FROM KERALA by Abdulla Paleri, Md. Jahir Rayhan & Amal Ev	117
GECKO EATS ABDOMEN OF <i>ASOTA CARICAE</i> (FABRICIUS, 1775) (LEPIDOPTERA: EREBIDAE: AGANAINAE) by Sem Cordial	119
RANGE EXTENSION OF PURPLE SWIFT <i>CALTORIS TULSI</i> DE NICÉVILLE (LEPIDOPTERA: HESPERIIDAE) TO THE WESTERN HIMALAYA by Shankar Kumar, Raj Shekhar Singh, Paramjit Singh & Sundar Kumar	121
<i>ERANTHEMUM ROSEUM</i> (ACANTHACEAE) A NEW LARVAL HOST PLANT FOR THE CHOCOLATE PANSY BUTTERFLY <i>JUNONIA IPHITA</i> (LEPIDOPTERA: NYMPHALIDAE) by Raju Kasambe	125
NEEM FLOWERS (<i>AZADIRACHTA INDICA</i>) AS AN ABUNDANT SOURCE OF NECTAR FOR BUTTERFLIES IN AN URBAN LANDSCAPE IN DELHI, INDIA by Rajesh Chaudhary	128
REDISCOVERY OF THE ASSAM FLASH BUTTERFLY <i>RAPALA TARA</i> (LEPIDOPTERA: LYCAENIDAE) FROM UTTARAKHAND, INDIA by Gaurav Joshi	135
INDIAN TREE FROG <i>POLYPEDATES MACULATUS</i> CAPTURING AND SWALLOWING A LIVE GECKO by Priyadarshini Supekar & Raju Kasambe	136
NEW LARVAL HOST PLANT OF <i>TRYPANOPHORA SEMIHYALINA</i> KOLLAR [1844] (INSECTA: LEPIDOPTERA: ZYGAENIDAE: CHALCOSINAE) FROM WEST BENGAL, INDIA by Arajush Payra	138
FIRST REPORT OF THE NORTHERN JUNGLEQUEEN BUTTERFLY (<i>STICHOPHTHALMA CAMADEVA</i>) FROM MIZORAM, INDIA by Lallawmsanga & R. Zoramchhuana	141
<i>ERANTHEMUM ROSEUM</i> (ACANTHACEAE): A NEW LARVAL HOST PLANT FOR THE SOUTHERN BLUE OAKLEAF BUTTERFLY <i>KALLIMA HORSFIELDII</i> KOLLAR, 1844 (LEPIDOPTERA)	108

by Raju Kasambe & Dilip Giri	143
CONFIRMATION OF THE REDBREAST BUTTERFLY <i>PAPILIO ALCMENOR</i> (LEPIDOPTERA: PAPILIONIDAE) IN UTTARAKHAND, INDIA by Rajiv Butalia, Shankar Kumar & Ambica Agnihotri	146
TWO NEW BUTTERFLY SPECIES FOR NEPAL: <i>EUREMA ANDERSONI</i> (PIERIDAE) AND <i>LETHE DAKWANIA</i> (NYMPHALIDAE) by Piet van der Poel	148
THE DRAGONFLY <i>ATRATOTHEMIS REELSI</i> WILSON, 2005 IN NAMDAPHA TIGER RESERVE, NORTHEAST INDIA- AN ADDITION TO THE INDIAN ODONATA FAUNA by Minom Pertin, Roshan Upadhaya, Tajum Yomcha & Arajush Payra	153
FIRST RECORD OF LEECH'S SWIFT <i>CALTORIS BROMUS</i> LEECH, 1894 (INSECTA: LEPIDOPTERA: HESPERIIDAE: HESPERIINAE) FROM WEST BENGAL, INDIA by Rajib Dey	155
OVIPOSITION BY <i>JAMIDES BOCHUS</i> (STOLL, [1782]) (INSECTA: LEPIDOPTERA: LYCAENIDAE) IN NEW DELHI, INDIA by Rajesh Chaudhary & Vinesh Kumar	157
DISTRIBUTIONAL RANGE EXTENSION OF BANANA SKIPPER <i>ERIONOTA TORUS</i> (LEPIDOPTERA: HESPERIIDAE) TO THANE AND PALGHAR DISTRICTS OF MAHARASHTRA, INDIA WITH DISCUSSION ABOUT ITS HARMFUL EFFECTS ON LOCAL BANANA PLANTATIONS by Sagar Sarang, Nilesh Chandorkar, Tejas Mehendale, Gaurav Khule, Abhinav Nair, Omkar Dame & Raju Kasambe	158
NECTAR RETRIEVAL BY INSECT SWARM DOES NOT RESULT IN POLLINATION OF <i>LYONIA OVALIFOLIA</i> FLOWERS IN THE KUMAON HIMALAYA, INDIA by Ambica Agnihotri	163
A COMPREHENSIVE CHECKLIST OF BUTTERFLIES SEEN IN CORBETT TIGER RESERVE, UTTARAKHAND, INDIA by Rajesh Chaudhary, Sanjay Chhimwal & Vinesh Kumar	167
THE ZEBRA SKIPPER BUTTERFLY <i>SPIALIA ZEBRA</i> : AN ADDITION TO THE BUTTERFLIES OF INDIA by Mukesh Panwar	187
CONFIRMATION OF THE ROSY FLASH BUTTERFLY <i>RAPALA ROSACEA</i> (LEPIDOPTERA: LYCAENIDAE) IN MIZORAM, INDIA by Lallawmsanga & Zothansangi	188
SOME NEW DISTRIBUTION RECORDS OF HESPERIID BUTTERFLIES IN NEPAL by Sajan K.C.	190
BUTTERFLIES OF GOVERNMENT NURSERY, BHATAGAON, CHHATTISGARH WITH TWO ADDITIONS TO THE STATE FAUNA by H N Tandan, Gulab Chand, Ravi Naidu & Swati Tandan	195

NEW LARVAL HOST PLANT OF *TRYPANOPHORA SEMIHYALINA* KOLLAR [1844] (INSECTA: LEPIDOPTERA: ZYGAENIDAE: CHALCOSINAE) FROM WEST BENGAL, INDIA

Introduction

Trypanophora semihyalina Kollar, [1844] (Zygaenidae: Chalcosiinae) occurs in South and Southeast Asia. In India it is reported from Southwest India to N.W. India and in N.E. India (Ahmed *et al.*, 2015). According to Robinson *et al.* (2010), the known larval host plants of *T. semihyalina* are *Barringtonia acutangula* (Lecythidaceae), *Carissa carandas*, *Holarrhena sp.* (Apocynaceae), *Lagerstroemia indica*, *Lagerstroemia speciosa* (Lythraceae), *Ricinus communis* (Euphorbiaceae), *Shorea robusta* (Dipterocarpaceae), *Terminalia catappa*, *Terminalia tomentosa* (Combretaceae), *Bombax ceiba* (Malvaceae), *Ziziphus mauritiana* (Rhamnaceae), *Gardenia sp.* (Rubiaceae), *Rosa sp.* (Rosaceae). This moth is also reported as a defoliator of *Gmelina arborea* (Meshram & Garg, 2000). From southern West Bengal, it has also been reported as a pest of *Mangifera indica* (Anacardiaceae) (Jha & Paul, 2002).

Observation

On 4.iii.2020, one final instar caterpillar of *T. semihyalina* was observed feeding on the leaves of guava (*Psidium guajava*) (Fig. 1) at the author's garden, near Bara Solemanpur Village (21°40'19.08"N, 87°34'29.75"E, 7 m a.s.l.) of Purba Medinipur District, West Bengal, India. The next day, two larvae were also observed feeding on guava leaves next to the previous plant. One larva was taken for

rearing from the guava plant, but unfortunately the pupa it formed was damaged by ants. Later, between March, 2020 and July, 2020, many larvae were observed on *Mangifera indica* (Fig.2) and *Ziziphus jujuba* (Fig.3) plants at the same place. A few larvae were collected for rearing and only three females successfully emerged (Fig. 6). The larvae are dark chocolaty brown with lateral side of four posterior segments yellow. The pupa is enclosed in a whitish pale red cocoon (Fig. 5). The larvae were actively feeding during day time in nature as well in captivity. Like most Chalcosiinae, the larvae of *T. semihyalina* also display chemical defense (Fig. 4). They release droplets containing poisonous chemicals from the cuticle in response to physical irritation/disturbance and re-absorbed the droplets quickly when the irritation stopped. *Psidium guajava* is a well-known fruit plant of Myrtaceae family, widely distributed in tropical and subtropical regions of the world. Hitherto, available records show no plants were reported under Myrtaceae as larval host plants of *T. semihyalina*. Therefore, *Psidium guajava* is being reported here as a new larval host plant of *T. semihyalina* from India.

Acknowledgement

I am thankful to Ms. Kamalika Bhattacharyya for helping in identification.
